

Computer Vision

Computer Vision is a field of AI that enables machines to interpret and understand visual information from images and videos.

Key Tasks:

- Image Classification
- Object Detection
- Image Segmentation
- Face Recognition

Popular Models:

- CNN
- YOLO
- ResNet
- VGG16

Evaluation Metrics:

- IoU (Intersection over Union)
- mAP (Mean Average Precision)

Applications:

- Medical Image Analysis
- Self-driving Cars
- Surveillance Systems
- Wildlife Monitoring
