

Natural Language Processing (NLP)

NLP is a field of Artificial Intelligence that focuses on interaction between computers and human language.

Common NLP Tasks:

- Tokenization
- Stemming
- Lemmatization
- Part-of-Speech Tagging
- Named Entity Recognition
- Sentiment Analysis

Popular NLP Models:

- Bag of Words
- TF-IDF
- Word2Vec
- BERT
- GPT

Applications of NLP:

- Chatbots
- Machine Translation
- Text Summarization
- Question Answering Systems
